

I pay my \$9.95 per month listner fee to avoid these relentless attacks on the first ammendment right to freedom of speech. I am growing evermore concerned with the power that "big brother" is trying to impose on we the american citizens to strip us of our rights! If I am paying for a service, no one should have the right to limit what I hear, that is what I am paying for. XM Satellite Radio provides people with numerous programing options for all races, religions and creeds and also provides useful information in the form of traffic and weather that you cannot always get in an instant on public radio the way you can on XM. We the paying listeners urge you not to dictate to us what we pay to hear!
